MATERIAL REQUIREMENTS PLANNING (MRP)

Enterprise Resource Planning Solutions

WHO USES THE SOLUTION?

- Sales Consultants
- Project Managers

Material Requirements Planning (MRP)

Qmuzik's Material Requirements Planning (MRP) is an extremely powerful and feature-rich tool. MRP has the ability to balance supply as well as demand accordingly, with predefined lot sizing policies, lead times etc., all while taking into account contract requirements or shelf life expiration dates for products being planned based on quality standards you set yourself!

With Qmuzik's MRP solution, you can finally get a handle on how much inventory is being held by each store and make sure it doesn't exceed their limits. Additionally, order release becomes easier than ever before as well since updates will be sent out automatically based off what stocks remain available for purchase or delivery!

BENEFITS

- ✓ Multi-level pegging to the source of demand.
- ✓ Peg identification.
- ✓ Discrete contract and project planning.
- ✓ Dynamic workbenches for material planners, production planners and buyers.
- ✓ Simulations and MRP runs may be executed.

SYSTEM FEATURES

- ✓ Work benches.
- ✓ Order operations and shop floor load.
- ✓ Discrete project planning.
- ✓ Simulation capability.
- ✓ Order splitting and auto-release.
- ✓ Real-time.
