# PROJECT MANAGEMENT

Enterprise Resource Planning Solutions

**WHO USES THE SOLUTION?**

- Project Managers
- Supply Chain Managers

# Project Management

Qmuzik's **Project Management** solution is a rock solid enterprise resource planning solution that gives businesses the right tools to plan, dispatch and control all project related activities. You can automate key processes such as engineering release and resource allocation. This ensures that your company is always in compliance with federal regulations for example when it comes time to file taxes

Qmuzik's **Project management** has been integrated with all of the ERP modules to provide a real time, detailed visibility into resource availability and production capabilities. This allows managers not only know what they need in advance but also how much it will cost when implemented so there are no surprises down line.

## BENEFITS

- ✓ Real-time, multi-level visibility of budget and schedule status with user-customisability.
- ✓ Flexible work breakdown structures with unlimited levels.
- ✓ Work-flow-based approval and communication.
- ✓ Project work breakdown structure can be mapped into the engineering hardware structure.
- ✓ Project pegging is retained at all levels in the Supply chain.

## SYSTEM FEATURES

- ✓ Document Management.
- ✓ Project MRP.
- ✓ Engineering Release Management.
- ✓ Requisitions, Timesheets and Commitment Workflow.
- ✓ Support for Complex Projects.
- ✓ Integration with Microsoft Project 2000TM.
