PRODUCTION MANAGEMENT

Enterprise Resource Planning Solutions

WHO USES THE SOLUTION?

- Production Managers
- Supply Chain Managers

Production Management

Our Qmuzik Production Management solution is an all in one system that helps you to plan, monitor and report on your production activities. It provides comprehensive tools for scheduling of jobs as well as efficient ways to analyse their progress through reports.
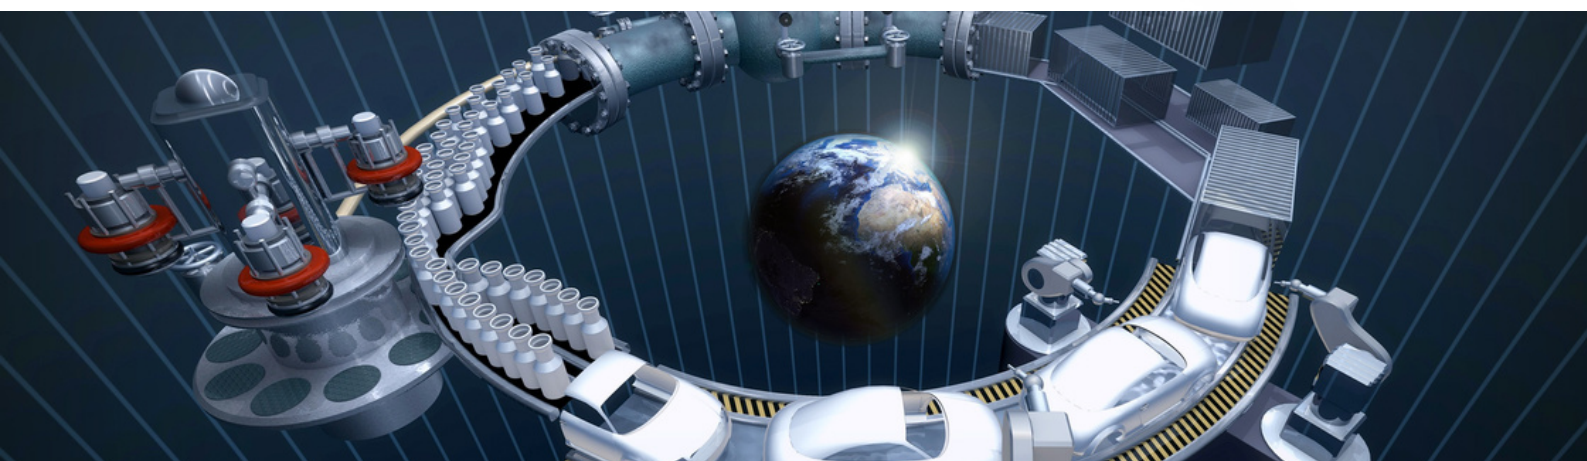

Qmuzik's Production Management solution streamlines the production life cycle, improves efficiency of manufacturing operations and provides real-time visibility from start to finish. It is a fully integrated platform was the perfect fit for these highly automated, focused factories.

BENEFITS

- Seamless integration with the other ERP modules.
- Efficient scalability for high volume factory automation.
- Easily interfaces with programmable machines, SCADA systems and radio frequency (RF) data.
- Minimizes obsolescence, retrofits and scrap.
- Manages engineering baselines.

SYSTEM FEATURES

- Serial/lot number position annotation.
- Revision, Serial and Lot Number Control.
- Flexible Post Deducting of Material and Labour.
- Contract/Project and Priority Identification.
- Flexible Inventory Valuation.
- Subcontracted Operations.
- Order Linkage and Allocation.
- Repair and Refurbishment.
- Document Management.
- Shop Floor Management Workbench.
