REQUISITIONS

Enterprise Resource Planning Solutions

WHO USES THE SOLUTION?

- Production Managers
- Supply Chain Managers

Requisitions

Qmuzik is the perfect **Requisitions** solution for any project that needs to be managed and executed with precision. With our excellent functionality, you can ensure all of your organisation's policies are being met by making sure they're adhered to.

Grouping **Requisitions** allow you to set up an account or project with a limited amount of spending power. Subsequent linked/child requests may be auto approved by referencing them back into your already established group, subject to stop and warn limits on that particular grouping's total spending's for the year.

BENEFITS

- Grouping requisitions may also serve as mini-projects to collate a myriad of expenses.
- Requisitions may be auto approved by referencing them to an already approved grouping requisition.

REQUISITION APPLICATIONS

- Purchasing of parts
- Services
- Cash purchases & Cash advances
- Maintenance & Order Issues
- Transport
- Unplanned issues
- Stock transfer
